

Mohib ur Rehman

Full-Stack Developer | Application & Mobile Engineering

+92 333 8052 583 • rajamohib9@gmail.com • Rawalpindi, Pakistan • [LinkedIn](#) • [GitLab](#)

PROFESSIONAL SUMMARY

Results-driven **Full-Stack Developer** with 3+ years of production experience architecting and delivering scalable web and mobile applications using React.js, Next.js, React Native, Node.js, NestJS, and Django REST Framework. Proven expertise in RESTful API development, real-time systems (WebSockets), blockchain/Web3 integrations, and responsive UI design. Consistently ships clean, maintainable code aligned with Agile best practices and modern development standards.

WORK EXPERIENCE

Full-Stack Developer

Silverthread Labs

Nov 2025 – Present | Rawalpindi

- Architected and shipped a full-stack **Office Management Portal** using Next.js (TypeScript) and NestJS, streamlining internal workflows for 20+ staff members and cutting manual admin time by ~30%.
- Engineered **role-based authentication** (5 permission levels) with Tailwind CSS responsive UI, eliminating unauthorized data access incidents.
- Designed and optimised scalable **RESTful backend APIs** for user and data management, achieving consistent sub-200 ms response times under concurrent load.
- Contributed to a **Blockchain-Based Web Game** (Next.js + Python backend); integrated smart contract interactions and implemented WebSocket state synchronization, enabling low-latency gameplay for multiple concurrent users.

Mobile App & MERN Stack Developer

Kryptohive

Jan 2025 – Nov 2025 | Rawalpindi

- Developed a **barber-booking mobile app** (Expo React Native, Redux Toolkit, Django REST Framework) enabling real-time appointment scheduling; reduced booking friction for end users through intuitive UI flows.
- Engineered a **custom HRMS platform** (Next.js, Tailwind CSS, Redux Toolkit, Chart.js, Django REST Framework) with analytics dashboards and employee management tools, supporting 100+ employee records.
- Built an **AI prompt generator app** (Expo React Native, Redux Toolkit, Django DRF) with integrations for 5+ AI model APIs, delivering tailored prompt outputs through a clean, performant UI.

Full-Stack Developer

Kryptohive

Jun 2024 – Jan 2025 | Rawalpindi

- Spearheaded development of a **Web3-based MOBA game** (PixiJS, React.js, Colyceus, Django REST Framework) with real-time game rendering, NFT crafting, and blockchain asset management.
- Implemented **secure RESTful API endpoints and real-time data flow** between frontend and backend, integrating Web3.js smart contract logic for on-chain player interactions.
- Optimised backend performance to sustain **low-latency gameplay** across multiple concurrent WebSocket sessions.

Front-End Developer

Kryptohive

Jun 2023 – Jun 2024 | Rawalpindi

- Delivered a **full-featured eCommerce platform** (React.js, MUI, Redux Toolkit, Redux Store) with multi-vendor marketplace support and dynamic product management.
- Built and deployed the **company's official website** (Next.js, Tailwind CSS) with a focus on Core Web Vitals performance, SEO optimisation, and responsive design.
- Implemented reusable component library and scalable state management architecture, reducing future feature development time.

Blockchain Developer

Kryptohive

Feb 2023 – Jun 2023 | Rawalpindi

- Developed multiple **Ethereum-based coin management systems**, tracking performance and analytics in real time using NestJS, Next.js, MongoDB, and Tailwind CSS.
- Integrated a **custom Telegram bot** for automated real-time coin updates and management alerts, reducing manual monitoring overhead.

Front-End Developer (Intern)

Kryptohive

Nov 2022 – Jan 2023 | Rawalpindi

- Developed and deployed a **real-time attendance management system** and a responsive dating web application with modern UI/UX using Vue.js, React.js, and Redux Toolkit.
- Strengthened expertise in component-based architecture, state management, and front-end performance optimisation using Next.js.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, JSX, HTML5, CSS3, SCSS
Frontend	React.js, Next.js, Vue.js, Redux Toolkit, MUI (Material UI), Tailwind CSS, Chart.js, PixiJS
Backend	Node.js, Express.js, NestJS, Django REST Framework (DRF), RESTful APIs, WebSockets, Firebase
Databases	MongoDB, PostgreSQL, Firebase Realtime DB, MongoDB Atlas
Mobile	React Native (Expo), Redux Toolkit, Django REST Framework
Blockchain / Web3	Ethereum, Smart Contracts, Web3.js, NFT Game Mechanics, Telegram Bot Integration
DevOps / Tools	Git, GitHub, Postman, VSCode, Jira, Trello, AWS, Docker, Heroku, CI/CD
Methodologies	Agile, Scrum, REST API Design, Microservices, Version Control

SELECTED PROJECTS

Office Management Portal | Next.js · NestJS · TypeScript · Tailwind CSS · Role-Based Auth

Full-stack portal streamlining workflows for 20+ staff. Secure RBAC with 5 permission tiers.

Barber Booking Mobile App | Expo React Native · Redux Toolkit · Django REST Framework

Real-time appointment scheduling app connecting users with nearby barbers.

Web3 MOBA Game | PixiJS · React.js · Django REST Framework · Web3.js · Colyceus · WebSockets

Multiplayer blockchain game with real-time rendering, NFT crafting, and smart contract interactions.

Custom HRMS Dashboard | Next.js · Chart.js · Redux Toolkit · Django REST Framework

Analytics-driven HR platform managing 100+ employee records with custom dashboards.

eCommerce Marketplace | React.js · MUI · Redux Toolkit · Redux Store

Multi-vendor eCommerce platform with dynamic product management and integrated marketplace.

Multiplayer Word Guessing Game | Next.js · WebSockets · NestJS

Real-time multiplayer game with low-latency WebSocket state synchronization for concurrent players.

EDUCATION

BS Computer Science

NUML Islamabad

Feb 2018 – Jan 2022 | Islamabad
